

Cheap ERP vs OmegaCube ERP

Cheap ERP

OmegaCube ERP

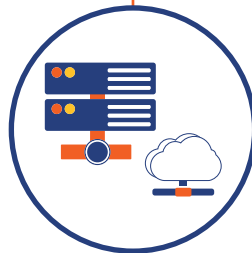

Very **limited functionality** with basic features such as, accounting, sales, purchasing and inventory.

Functionality

Vast functionality list that includes critical manufacturing modules such as, production planning, MRP, MES, shop-floor management, inventory optimization, quality & compliance, etc.

Can be deployed **only on the cloud** for limited number of users and locations.

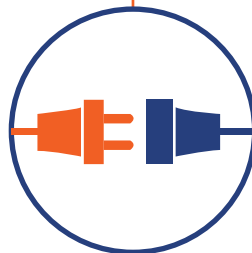

Deployment

Can be deployed **both on a private or a public cloud or on premises**.

It can be easily moved from the cloud to on-premises and vice versa.

Limited capability to integrate and function seamlessly with key manufacturing systems.

Integration

Can be **integrated with industry leading applications** for bar-code, nesting, CAD, e-commerce, machine monitoring, EDI, sales tax compliance, and shipping, etc.

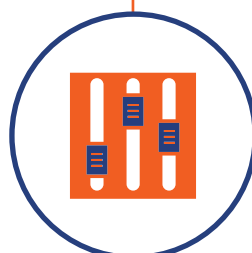

Limited features, capability and lack of advanced manufacturing functionalities prevent enterprise scalability and growth.

Scalability

OmegaCube ERP **adapts to your enterprise workflows** with its advanced integration and customization capabilities, centralized database, cloud/on-premise deployment and mobility.

Minimum customization capability

Customization

OmegaCube ERP can be **easily customized** based on your enterprise needs. You can selective customize certain features, and build custom applications using low-code development.

Minimal support options via AI chatbot or email.

Support

OmegaCube has a **dedicated support team** who can be reached on call or email for technical support.

Pay more for additional functionalities, integration capabilities, customization, and advanced support.

Pay for More

No additional cost for any additional features or support.

OmegaCube ERP is an enterprise resource planning system designed primarily for small and medium-sized manufacturers and distributors. It enables enterprises to automate and integrate workflows, improve process efficiency, and get real-time visibility across their operations (inventory, production, quality, finance, etc.)
