

MOBILITY BASED WORKFLOW AUTOMATION

FOR YOUR ENTERPRISE
WITH **OMEGACUBE ERP**

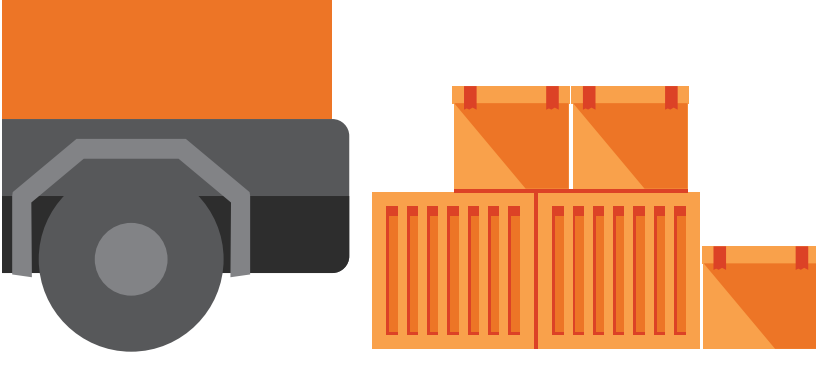

Access ERP Anywhere, Anytime

OmegaCube ERP is a browser and device-independent, which means it can be opened on any supported browser (Firefox, Safari, Google Chrome, Microsoft Edge, etc.) from any supported smartphone or tablet device (iOS, Android, Windows OS).

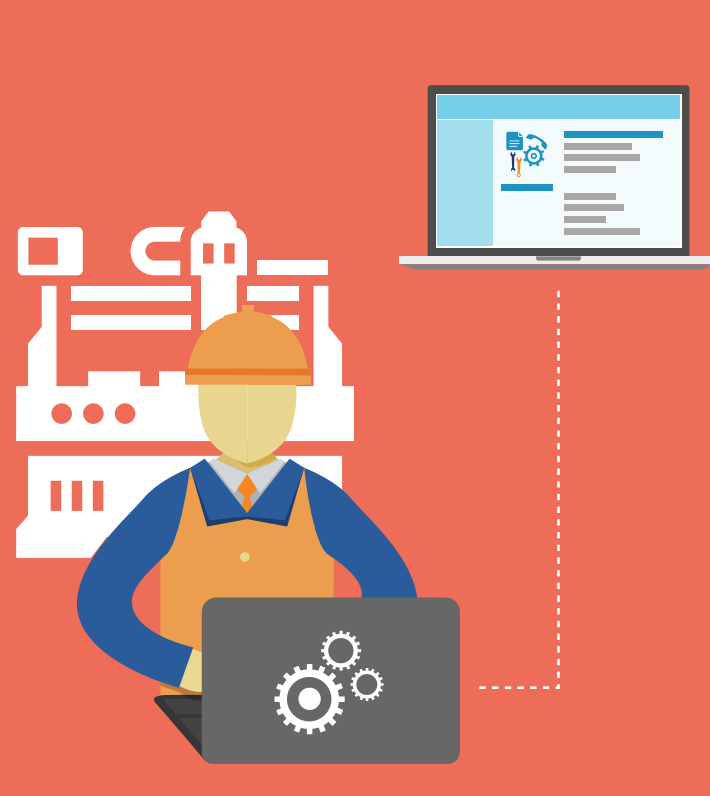

Purchasing & Goods Receiving Mobility

- Auto-generate or manually raise POs to suppliers from anywhere.
- Instantly scan goods via portable scanners connected to tablets/phones.
- Generate bar-coded inventory labels during goods receiving.

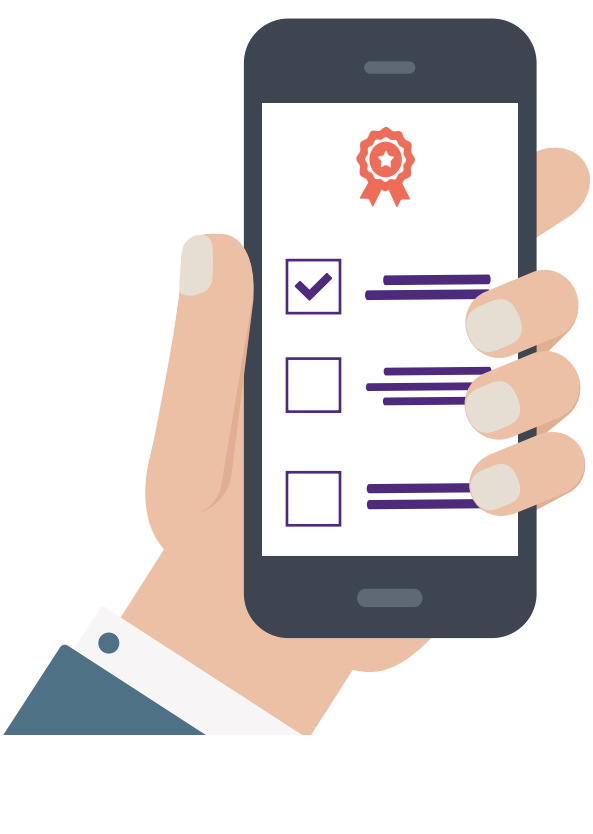

Manufacturing Mobility

- Instant creation & update of work orders.
- Shift & job login and logout from mobile/tablets.
- Upload item images & progress info on the ERP for a particular work order.

Quality Management & Control Mobility

- Instantly update quality data on-the-go during goods inspection.
- Access item catalog with item number, description, type, quantity available & price.
- Upload images of inspected products and observed defects on the ERP.

Inventory Management Mobility

- Perform item-wise, physical count & adjust inventory.
- Transfer inventory from one location to another.
- Instantly scan kanban card numbers with device.
- Quickly generate bar-coded inventory labels during goods receiving.

Service Management Mobility

- Access service schedule and history.
- Access assigned service tickets on devices for quick action.
- Update timesheet with work details, no. of hours worked, amount and date.
- Publish requests, tickets and service ticket data to field personnel.

Shipping & Delivery Mobility

- Capture customer signatures on supported smartphones and tablets during shipment delivery.
- Access relevant order information and invoices on devices.

Sales Management Mobility

- Get instant access to sales data on the move.
- Access customer-wise recent shipments.
- Access customer-wise open orders and open invoices.
- Access contact details of customers and sales data while on the field.

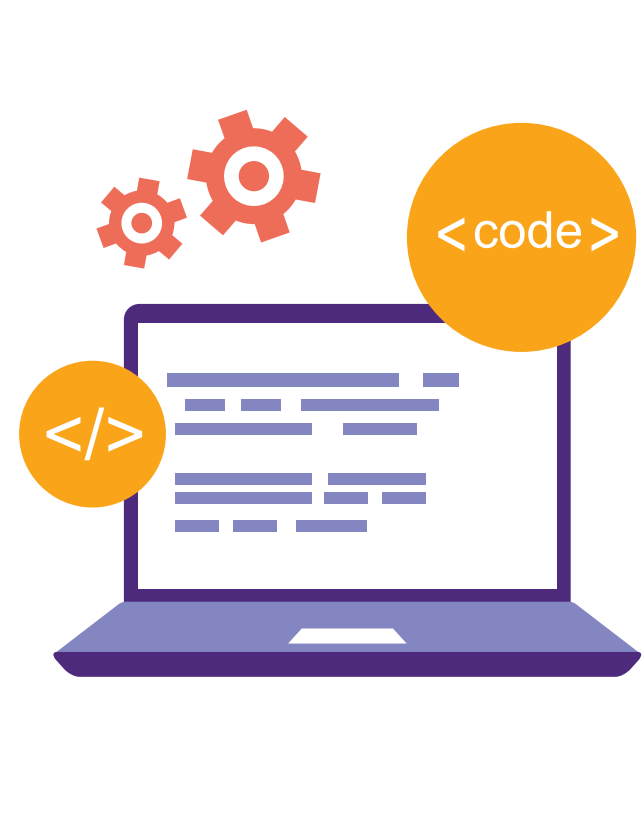

Mobility for CXOs

- Access year/month/day wise invoiced sales, shipments, booked sales, quotations & cash received.
- Access sales trend vs. last year, accounts receivables and payables summary.
- View sales forecasts & upcoming production numbers.

Mobile Application Development

- Build mobile applications with minimal technical knowledge using application development tools.
- Build applications for iOS and Android platforms.
- Develop and deploy mobile applications to end-users internally and external stakeholders.

Mobile Application Security

- Enable access to relevant mobile applications based on user-defined security roles for users.
- Provide role-based security for customers and vendors and allow them access to specific information.
